KA SERIES
Rack Conveyor Dishwashers
For nearly a century, MEIKO has been developing and perfecting products that help customers around the world work more efficiently. We’re proud to be a trusted name in commercial warewashing, healthcare cleaning and disinfection and food waste disposal technology — and our entire team is committed to supporting you and your operation. Whether it’s installation, preventative maintenance or anything you need, we’re ready to be partners for life.
INTRODUCING THE KA SERIES FROM MEIKO

Your clean solution starts here.

With so many commercial warewashing brands to choose from, it’s more important than ever to go with a trusted, tested solution that gets the job done. MEIKO delivers superior performance and exceptional value with the all-new KA Series rack conveyor system. Its unique wash arm spray pattern ensures effective coverage with varying angles and offset spray jets.

The KA Series also features slotted, concave wash nozzles and tethered end caps to promote easier cleaning. And with its double-wall insulated doors, the KA Series minimizes noise and heat loss while keeping the exterior of the equipment cool to the touch.

- Glass touchscreen control panel featuring graphics and plain text
- Standard machine sizes
- Sealed, reversible hinged doors
- Three conveyor speeds to handle varying levels of soiling
- Low water and energy usage
- Built-in “Smart” booster heater
- Simplified service diagnostics, error logging, troubleshooting and real-time performance updates
KA SERIES — take a closer look

- Protecting the environment with superior water savings
- Helping you save with optimal energy efficiency
- Ensuring easy operation with advanced controls
- Building the best system with operators in mind
- Maximizing value with a versatile modular design
The difference is clear.

With the KA Series from MEIKO, you get the industry’s clearest look at the warewashing process from start to finish. The high-contrast touchscreen panel displays available functions in multiple languages, reducing the risk of operator errors.

The illuminated panel is designed to keep operators fully informed at every stage of the washing process. All key information is clearly available at a glance — and with simple, one-touch operation at your fingertips, it’s never been easier for people and equipment to work together.
High-performance blower-dryer unit

Using just 3.6–4.5kW of heating energy (depending on the operating voltage), MEIKO’s innovative blower-dryer unit incorporates a single blower with electric heaters to improve drying. With this optional feature, operators can avoid time-consuming drying and unsightly spotting on ware.

Performance Data

SINGLE-TANK
• KA 44/66/80, KA 54/76/90
• 71 GPH
• 243 racks per hour
• 0.29 gallons/1.11 liters per rack
• Conveyor speed 6.75 feet/2.01 meters per minute

MULTI-TANK
• KA 64/86/100
• 86 GPH
• 355 racks per hour
• 0.24 gallons/0.92 liters per rack
• Conveyor speed 9.88 feet/3.01 meters per minute

Optional Features
• Waste Air Heat Recovery System (WAHRS)
• High-efficiency blower-dryer unit
• 90º unloader/blower-dryer unit
• 90º loaders/unloaders

Waste Air Heat Recovery System (WAHRS)

MEIKO’s award-winning Waste Air Heat Recovery System (WAHRS) reclaims and reuses heat generated by the machine — reducing energy consumption while allowing hot-water sanitization from a cold water supply. The WAHRS also helps maintain optimal indoor air quality for staff in back-of-house areas.
Blue is for you.

A key factor in getting the most out of any equipment is preventative maintenance. MEIKO makes it easier than ever with our user-friendly blue cues — indicating which components and parts are suitable for hands-on cleaning. It’s fast, it’s intuitive and it’s all possible without bulky instruction manuals or complicated directions.

Service you can count on.

Our world-class team can help configure the perfect system for your facility, then keep it running smoothly and reliably for years to come. We’re dedicated to providing the highest standard of service before and after the sale, ensuring the highest levels of customer satisfaction.
