Instructions for use:

For use of **MEIKO ACTIVE C-420 Presoak Cutlery** fill presoak container with warm water (max. 45 °C). The dosage is determined by soil level and water hardness. Add the utensils to the presoak solution. Leave it work for at least 5-10 minutes. Rinse well or run through dishwasher.

Recommended dosage:

5 – 10 g/l water

Special information!

For metals and alloys different than silver or stainless steel always check material compatibility before use. For silver ware use stainless steel rack and put aluminum foil underneath for electrolytical basic cleaning.

Composition and Detergents Regulation information

Please see Safety Data Sheet.

Storage conditions

Store between 0 and 40 °C.

Safety information

Do not mix with any other products! For professional use only. For further information and safety instructions, please see product label and Safety Data Sheet.
