Instructions for use:

MEIKO ACTIVE FR 80 is used with a dosing unit. The dosing is determined by water hardness, wash cycle time, degree of soiling, type of dishwashing machine, type of washware, etc.

Recommended dosing:

2-5 g/l water

Specific note:

If products are switched, a service technician must attend. Before first using a new product type, always wash the dosing pipe with clean water to avoid any build-up of crystallisation. Not for use on aluminium or other light metals. Do not mix with any other products!

Composition and Detergents Regulation information

Please see safety data sheet.

Storage conditions

Store separately from acids. Store between 0 and 40 °C.

Safety notice

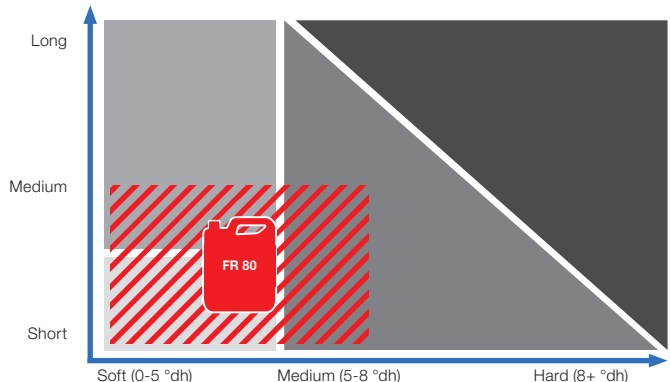

For professional use only. For further information and safety notices, see product label and safety data sheet.
